

Fort Bend County Project Lifesaver

What is Project Lifesaver?

Project Lifesaver International is a 501(C)(3) non-profit organization to help individuals with cognitive conditions such as Autism, Dementia, Alzheimer's, or traumatic brain injury who have a history of wandering. The program was originally founded in 1999 and has since grown and proven to be an effective method of bringing a loved one back home safely. This device uses time-tested radio frequency technology to provide families peace of mind that their loved ones can be found if they wander.

Fort Bend County Sheriff's Office program is in collaboration with Project Lifesaver International is equipped with the necessary technology and training to respond to an elopement and effectively manage the safe return of an individual.

What does the program entail?

Fort Bend County: Project Lifesaver relies on proven radio technology and trained teams. Individuals enrolled in the program wear a small transmitter either on the wrist or ankle that emits a frequency signal. If the individual enrolled in the program goes missing, the caregiver notifies Fort Bend County Sheriff's Office, and a trained emergency team responds to the area. Once the individual is found they will bring them home safely.
